

# CLARKE ACCESS CONTROL PRODUCTS

## HALF HEIGHT TURNSTILE

### Type 461 Features

**Type 461** half height single or double electrically operated turnstiles feature 90-degree rotors with straight or hooped bars and are suitable to operate in an internal or external environment.

Powder coated or stainless steel finish options available.

Electrically controlled for entry/exit or free wheel option. Available with fail locked or unlocked solenoids to conform to security or fire safety requirements. A 12-volt dc logic control unit integral with the 230-volt mains AC mains supplied power unit. The logic control readily accepts voltage free contacts from most access control devices, eg. card readers, code locks, proximity readers, etc.

(Manually operated foot pedal turnstiles available).
