

CLARKE ACCESS CONTROL PRODUCTS

ELECTRIC RELEASES FOR MORTICE LATCHES

Type 903

These releases have Fail Open or Fail Locked modes, with or without sensing and can be ordered with various face plate styles
- see price list for nomenclature.

- **Designed for Internal Applications**
- **Manufactured in Brass**
- **Electrically Controlled**
- **UK Manufactured**

Technical Specification

Machined from solid brass with stainless steel faceplate

Standard Voltage 12v DC, 100%

Current Consumption 0.3A at 100%

Locking Plunger 6mm stainless steel - withstands up to 2000lbs

Microswitch Sensing Available as standard for latch sensing.

Non standard faceplates available to order, to suit some sash locks where the second dead bolt is used to override the electronic control system and engages with the specially machined fixed keep within the electric release faceplate.
