

CLARKE INSTRUMENTS LIMITED

MECHANICAL GATE

TYPE 189-200

Standard Mechanical Gate

The gate is designed to be opened through 90 degrees and return to the closed position under spring tension. A standard feature of the gate is the ability to be opened in the reverse direction by firm body pressure to give an emergency exit facility. (90 degree only)

- Single direction with emergency break out facility
- 500mm—1000mm gate arms
- Bright Chrome Finish

Options:

- Additional post fitted with a magnetic lock for securing the gate (Single Direction Only)
- Bi- directional gate designed to be open through 180 degrees to allow free passage through the gate from either direction, yet still closes under spring tension to ensure the gate arm is always controlled.
